SUMMARY

I am a Frontend Developer and an AI/ML enthusiast currently studying Electronics & Telecommunication Engineering. With hands-on experience in frontend development using React.js and Tailwind CSS, my strong interest lies in AI technologies and software development. I aim to leverage my skills in building responsive web applications and contribute to innovative projects.

EDUCATION

Bachelor of Engineering 2023 - 2027

Madhav Institute of Technology and Science

Branch: Electronics & Telecommunication Engineering

Gwalior, M.P.

High School Diploma 2008 - 2022

Emmanuel Mission School

Stream: PCM (Physics, Chemistry, Mathematics)

Bundi

CERTIFICATIONS

Frontend Development

Focused on HTML, CSS, JavaScript, React.js, and responsive web design.

AI/ML Basics

Covering fundamentals of machine learning, data analysis, and AI concepts.

Python Programming

Hands-on experience in problem solving, GUI development, and automation basics.

Cybersecurity Fundamentals

Linux environments, network security concepts, and basic penetration testing tools using Kali Linux.

SKILLS

Python

React

Tailwind

Node.js

Express.js

MongoDB

REST APIs

JSON

HTML

CSS

JavaScript

Cybersecurity

Responsive Web

Deep Learning

GUI

GitHub

Linux

Kali Linux

PROJECTS

Noise Reduction System using Deep Learning

A project aimed at improving audio and video quality through AI algorithms

- Developed a deep learning based noise reduction system for audio, video, and live video streams.
- Implemented AI/ML techniques to reduce unwanted background noise and improve media clarity.

FAI Workspace Orchestrator

An innovative tool designed to enhance coding productivity through AI assistance

 [GitHub Repository](#)

- Built an AI-powered VS Code extension with project memory, code automation, and intelligent workspace analysis.
- Integrated multi-agent AI workflow, smart code editing, validation, and project continuity across sessions.

TaskForge – Smart Team Task Management

A platform for managing tasks and collaboration among team members

 [GitHub Repository](#)

- Developed a full-stack team management platform using React, Node.js, Express.js, and MongoDB.
- Implemented project assignment, task tracking, admin approval workflow, and team collaboration features.
